DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Invention I: Claims 1-10, drawn to an image compression, classified in class 382, subclass 232.

Invention II: Claims 27-28, drawn to a data file structure, classified in class 707, subclass 100.

2. The inventions of Groups I and II are distinct from the each other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has a separate utility. Invention I has an image compression; and Invention II has a data file structure for displaying on a playback device having a predetermined amount of memory. These two utilities of inventions I and II respectively are distinct from each other can be separately usable. See MPEP ' 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, different filed of search for each of these inventions, and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
